

## Water dispensers for use in homes

**Water feels at home!**  
The quickest and most practical way to enjoy a drink.

-  **A triple saving: on running costs, time and space.**  
Water management at home is simplified, eliminating the need to purchase, transport or store water bottles.
-  **Unlimited water**  
Up to 15 liters per hour of still or sparkling cold water is dispensed from your tap at home, straight into the glass.
-  **Cutting - edge technology**  
Ice-bank cooling and cold carbonation technology offers optimum performance within a compact space.
-  **Power and compactness**  
Compact and discreet, it can be housed under the sink or on the worktop to increase efficiency in the kitchen!

Recommended accessories

**WATERBLOCK**  
Prevents accidental flooding caused by faults in the water supply line

**NO SHOCK**  
Absorbs sudden changes in the water mains pressure if an autoclave is fitted

**PRV**  
Reduces the water mains pressure

**H2O MY TOP**  
DISPENSER

**H2O MY IN**  
DISPENSER

**H2O MY OSMO**  
DISPENSER

Compact dimensions, modern design and intuitive operation; a champion of efficiency, style and simplicity.

-  **Counter-top solution**  
The counter-top model can be positioned on any support surface; its technologic design adds a modern touch to the surrounding environment.
-  **Hygiene**  
The dispensing area is protected from environmental pollution while the controls are situated at a safe distance from the dispensing point.
-  **Maximum safety**  
The safety valve prevents loss of water due to potential failures occurring inside the machine.
-  **Optional filtration**  
A wide range of filter systems is available to improve the taste and quality of the water.
-  **Materials**  
The front panel in ABS plastic is further enriched by the insert and the cover, both in stainless steel.

-  black/grey
-  white/grey
-  light blue/grey

				lit/h	dimensions
<b>H2O MY TOP A</b>				15	26x33x40,7 cm
<b>H2O MY TOP WG</b>				15	26x33x40,7 cm

**FC**  
Multilayer + active carbon filter with optional UV lamp, electronic water meter and electronic timer

**F-AC**  
AC chlorine filter/purifier

**F-CAL**  
Anti-limescale bacteriostatic chlorine filter/purifier

**F-SOFT**  
Ion exchange resin filter purifier for hardness reduction

**F-MICRO**  
Antibacterial microfilter

**F-SMALL**  
Customized chlorine filter/purifier with bypassing head

Simplicity, efficiency and safety in a single product!

 White

-  **Ultra-safe and soft water**  
The selective capacity of special avant-garde membranes is used to remove heavy metals, excess mineral salts and bacteria from the water through the process of osmosis.
-  **A unique product**  
The exclusive CSF (Constant Salinity Flow) patent guarantees a constant demineralised water salinity level. Maximum quality from the very first glass!
-  **The best tasting carbonated water**  
Compared to other osmotic systems, the carbonated water keeps its taste for longer.
-  **Maximum safety**  
The safety valve prevents loss of water due to potential failures occurring inside the machine.
-  **Anti-flooding sensor**  
Detects the presence of water on the floor and triggers an intermittent beep stopping immediately the operation of the cooler.
-  **Customised dispensing**  
A wide range of taps is available, so that you can choose the model best suited to your own requirements.
